AQUANOVA GRAVEL CLEANER (4.5)

The Aqua Nova Gravel Cleaners / bottom vacuum cleaner is a cleaner for aquarium bottom substrate. Includes a clear flask / dirt bell and a transparent hose made of high quality material, which ensures reliable operation for a long time.

By swirling your gravel in the flask / dirt bell, you not only remove dirt between the gravel, but the gravel itself is also rinsed clean and has a clear color again.

Clean your aquarium gravel and partially replace water at a time.
